Continuation of 11. does NOT place the application in condition for allowance because: On pages 3-5, applicant argues that Cook fails to disclose the rule including at least one condition based upon observation in real time of an action undertaken by a patron, relative to at least one prior action or inaction by the patron, and processing at least one image of the retail location to identify the condition. While the applicant's points are understood, the examiner respectfully disagrees. The examiner notes that Adrain, not Cook, was used to show this limitiation, in which Adrain discloses in column 4, lines 32-37, wherein the action undertaken by the patron is the hand movement. Therefore the rejection has been maintained.
